

# Reversible Temperature Indicating Labels

## VisAlert™ Series Indicating Labels

Reversible Temperature Indicating Labels are parts of Brady's VisAlert™ Series indicating labels that are designed to provide immediate visual indication of water or heat exposure.

These Labels are a cost-effective solution for temperature checks during maintenance or for trouble spotting during research and development. With an extremely low profile, these labels are ideal for components, industrial and household applications (such as electric pumps, rotating equipment, brakes and refrigerators) in cold chains, hot spaces or in areas where measuring temperature becomes difficult or impractical.

### Quick, easy and cost-effective

- Instant response on a large reading field
- No power necessary
- Continuous monitoring, even during power loss
- Strong adhesive for any surface

### Reversible temperature indicating labels

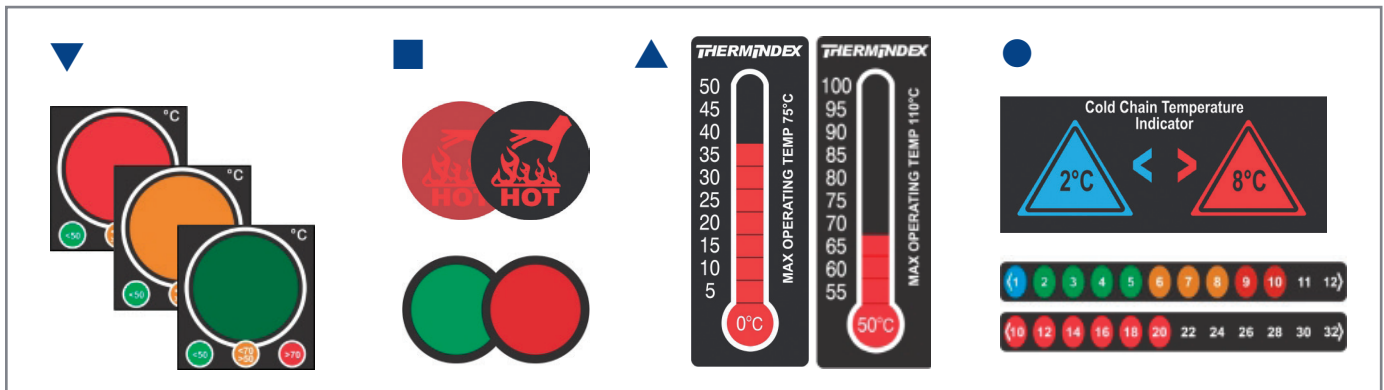

- Change color at designated temperatures
- Temperature ranges between 32°F and 212°F
- Highly customizable

Temperature Indicating Labels are preferably applied on a dry, clean surface for maximum effectiveness. At the same time, the strong adhesive minimizes the possibility of labels falling off, even on dirty or uneven surfaces.

## Reversible Temperature Indicating Labels

Label Type	Article Number	Order Reference	Description	Dimensions (mm)	Pcs. / Pack
▲	195837	TIL-7-0C-50C	11-LEVEL THERMOMETER 0-50°C	18 x 51	10
▲	195838	TIL-7-50C-100C	11-LEVEL THERMOMETER 50-100°C	18 x 51	10
●	195839	TIL-8-10C-32C	12-LEVEL ROOM THERMOMETER 10-32°C	90 x 10	10
●	195840	TIL-8-1C-12C	12-LEVEL FRIDGE THERMOMETER 1-12°C	90 x 10	10
●	195841	TIL-9-2C-8C	COLD CHAIN INDICATOR 2-8°C	96 x 40	10
▼	195842	TIL-10-50C-70C	TRAFFIC LIGHT INDICATOR 50-70°C	48 x 52	10
■	195843	TIL-11-43C-DIA	GO/NO GO INDICATOR 43°C	Ø 24	
■	195844	TIL-12-50C-DIA	HAND HOT INDICATOR 50°C	Ø 37	10
